# ASHRAE HKC

**Mr. Albert LIN**  
**President**  
ASHRAE Hong Kong Chapter  
2011-2012

## Message from **PRESIDENT**

I am much honored to be elected and appointed as the 28th President of ASHRAE Hong Kong Chapter. May I extend my heartiest thanks to the support and contribution from the Governors, officers, committee chairs and members. This year is a chance for me to serve our members and the society, after nurtured by ASHRAE for years.

As an engineer, I'm proud to be the ASHRAE member because ASHRAE inspires me that I can serve others by our professional knowledge, under its mission to serve humanity and promote a sustainable world by advancing technology in built environment.

The ASHRAE core values of Advancement, Leadership, Integrity, Service and Excellence are worth passing on. I was fascinated by the fact that there're intelligent minds working together voluntarily to advance the HVAC technology with passion and vision and to transform their

efforts into language that are practical at the working levels. Global widely used Standards like 90.1 which is about energy efficiency developed 35 years ago and newly developed Standard 189.1, which is about the design of high-performance, green buildings are vivid examples of ASHRAE dynamic efforts in contributing to the society, coping with the changing need of human beings and the environment in a sustainable way.

We are fortunate in Hong Kong that we can get in touch with such advancement. As the largest Chapter in Asia-Pacific region, Hong Kong Chapter has earned its reputation in advancing the arts and science of HVAC by the leadership of our Past Presidents and the Society. Undoubtedly, we should not miss our part to contribute to our home or even our country by passing on such important values and knowledge at the local level.

The year ahead of the HK Chapter is going to be exciting. I would like to enhance the Chapter's development in the following main areas:

### **First of all, Promotion of ASHRAE Standard**

Technology developed in Standards is the most important assets of ASHRAE which links the Society with its members and other stakeholders of the industry. Our members need educational programs, such as Technical Workshop and E-learning website, on how to accurately and efficiently model new and existing buildings and how to interpret the results. These additional educational opportunities build our members into experts in high performance buildings.

### **Secondly, Membership Promotion**

Apart from serving existing members by increasing new learning opportunity, we can also develop new recruitment theme to recruit new members like engineers who may expose to projects on high-performance and green buildings and students.

### **Thirdly, Nurturing Young Engineers**

ASHRAE had been active in outreaching student members through the establishment of student branches in different universities and colleges. By initiating the mentoring program this year, we believe our student members could have more opportunity to be trained. Also, for those young engineers, they can be nurtured to be the pillars of our Chapter through tailor-made program.

### **Last, but not least, Knowledge Exchange with Different Regions**

With the unique role of Hong Kong and the relationship with the mainland and other countries, HK Chapter can enhance its role in knowledge exchange by regional conference like CRC 2011 in this August and by visiting Mainland cities.

Before I end my speech, I would like to give special thanks to all current Governors, Officers, Committee Chairs and members who will continue to support ASHRAE Hong Kong Chapter.

# 2011-12

## Meeting Our COMMITTEE

Annual General Meeting 2011▶

### Officers and Board of Governors

President (CRC Delegate)	Mr. LIN Wan Fuk, Albert
President-Elect (CRC Alternate)	Mr. LO Chan Kit, Albert
Secretary	Ms. PANG Ching Man, Tracy
Treasurer	Mr. CHAN, Thomas
Immediate Past President	Ms. MO Cheung Ying, Eagle
Member, Board of Governors	Dr. HUI C.M., Sam
Member, Board of Governors	Mr. LI Siu Lam
Member, Board of Governors	Mr. PAU Wai Keung
Member, Board of Governors	Mr. TSE Kam Chuen, Vincent

# CRC 2011

Hosted BY ASHRAE HKC

▲Mr. Ronald E. Jarnagin, ASHRAE President 2011 - 12

The fourteen Chapters Regional Conference (CRC) of Region XIII was held at Kowloon Shangri-La Hotel in Hong Kong on 19-20th August, 2011. There was one technical seminar with the theme of High Performance Building Design held in the morning session of CRC on 19th August, 2011. The seminar was well attended with 344 participants including local members, overseas members and the distinguished guests from the headquarters of ASHRAE. The technical seminar had included three technical presentations that was delivered by Mr. Ronald E. Jarnagin, ASHRAE President; Ir Chan Fan, Frank, the Deputy Director / Regulatory Services, EMSD of HKSAR; Mr. Kent W. Peterson, ASHRAE Distinguished Lecturer.

After the morning session of CRC on 19th August, 2011, there were business sessions be held for discussion the regional matters among seven Chapters, i.e., Hong Kong Chapter, Indonesia Chapter, Malaysia Chapter, Philippines Chapter, Singapore Chapter, Taiwan Chapter and Thailand Chapter in the afternoon of 19th and 20th August, 2011. It was well attended by 58 members including all Chapter delegates, Chapter alternates, local and overseas Chapter committee chairs as well as the distinguished guests from ASHRAE headquarters. There were two motions passed in the business sessions, such as:

- Motion One : To provide options to allow new and current Student members to pay membership fees for multiple years, such as 2, 3 or 4 years, at the time of the first entry.
- Motion Two : To adopt the Region 13 Refrigeration Award of Excellence Point in the category of Presidential Award of Excellence.

The above two motions should be moved for discussion at the Society level in the coming Winter Meeting in Chicago.

▲ Presidential Luncheon

▲ Workshop

▲ Performance - Singapore

Apart from business sessions, all Chapter Delegates, Chapter Alternates, local and overseas Chapter committee chairs had attended seven training workshops in order to train their Chapter operation and its committee operation in coming term of service.

In order to provide more funs in the Banquet, the Hong Kong Chapter had invited all overseas Chapters in Region XIII to perform their culture shows in the Banquet on 19th August, 2011. This would help us exchange different culture among seven Chapters. The Banquet was also well attended with 279 members.

ASHRAE Hong Kong Chapter also received some awards below from ASHRAE Society in the Host Chapter Luncheon on 20th August, 2011.

- 2010-2011 PAOE Awards: Hong Kong Chapter (HIGH HONOR ROLL / SPECIAL CITATION / STAR)
- Regional Award of Merit Certificate: Edward Ka Cheung Tsui
- Chapter Service Award Certificate: Siu Lam Li
- Certificate of Appreciation: Sam C.M. Hui - Region Webmaster

# Book Launching Ceremony and Exhibition of “COOL Hong Kong”

Date of event: 19th Aug, 2011

**COOL** Hong Kong is not only a collection of the wisdom of the engineers who involved the system design, construction and operation but also a collection of many precious photos and drawings. In this book, important messages and articles from leading professionals and 25 renowned building projects are featured to witness the advancement of HVAC&R in the region. The description of HVAC&R system, controls/automation system and even building energy upgrade for these 25 selected projects are written in simple language so as to suit a broader range of readers. This book will provide invaluable information to our younger generation and also offers great ovation to the engineers who have contributed their profession in creating a COOL environment for the people in Hong Kong.

An official lunching ceremony of “COOL Hong Kong” was held at the Tai Po & Shek O Rooms, LL1 of the Kowloon Shangri-la Hotel at 11:45 a.m. on 19 August 2011 (Friday) during the Chapter Regional Conference (CRC) of ASHRAE Region XIII. The Society’s President from the U.S. was the guest of honor while good attendance of many international members, local members and non-members as well. In addition, an open exhibition of the Book was arranged at 1/F., Central Plaza from 18 August to 20 August 2011 for the general public.

“COOL Hong Kong” is the first book in Hong Kong’s history documenting comprehensively the development of HVAC&R (heating, ventilation, air-conditioning and refrigeration) for built environment in Hong Kong and is published by

ASHRAE (American Society of Heating, Refrigerating and Air-conditioning Engineers) Hong Kong Chapter to mark its 25th anniversary.

Contents highlight include Forward by Mr. Edward Yau, JP, Secretary for the Environment of Hong Kong SAR Government, Preface by Society President of ASHRAE and many other special yet interesting articles such as air-conditioning’s impact on the life of Hong Kong people, air-conditioning for SARS wards, evolution of air-conditioning systems in the government sector, HVAC development and future outlook, etc.

If you are interested to order the book, please kindly download the order form from our website and send the completed order form to us for processing as soon as possible.

# Retreat 2011

Date of event: 23th Jul, 2011

The Retreat 2011 of ASHRAE Hong Kong Chapter was held on 23rd July 2011 successfully. It aims to provide a chance for enhancing the relationship between ASHRAE committee members and know more about the Chapter operation in AHSRAE-HKC. There are totally 28 committee members joined this event. It separated into two sections. Firstly, we had the lunch gathering in the Central Plaza Executive Club. After the lunch, we gathered at the conference room for the second section. There were three presentations in this section.

First, we were honored to invite a toastmaster speaker, Mr. Sean Lin, to give a presentation on “Public speaking...practice doesn't make perfect” to us. Sean is the current lieutenant Governor Marketing China of Toastmasters International. Also, He received the Hong Kong's Ten Outstanding Young Persons Awards in 2006. In this presentation, he mentioned about the presentation skill for public. He gave us a valuable lesson in this presentation. After the speech, our ASHRAE-HKC President Mr. Albert Lin presented a prize to him.

For the second presentation, our President, Mr. Albert Lin also presented the Chapter operations for us. He explained the role of each committee.

For the third presentation, our Honor and Awards Committee Chair, Mr. Vincent Chu, gave a presentation “Time Management” for us. It aims to enhance the time period of the meetings in an effective way. He taught us some meeting techniques and problem solving skills.

# China Symposium

“Green and Sustainable Technology Development”

Date of event: 1st and 2nd Jul, 2011

The symposium was held successfully at “长沙华雅国际大酒店” ChangSha on 1 and 2 July 2011. The symposium was jointly organized by American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc. Hong Kong Chapter, The Chartered Institution of Building Services Engineers Hong Kong Branch, The Hong Kong Institution of Engineers Building Services Division, and our mainland partners, including 湖南省土木建築學會暖通空調專業委員會, 湖南省製冷學會空調熱泵專業委員會, 中國勘察設計協會建築環境與設備專業委員會湖南省委員會, 湖南省建築設計院·湖南省城市規劃研究設計院 and 湖南大學建築環境與設備工程學科. The symposium was also co-organized by Department of Building Services Engineering (PolyU).

The theme of the symposium was “Green and Sustainable Technology Development”. “綠色與可持續發展”. A total of 17 papers were published in the proceedings. 17 papers. All 17 papers were presented in Mandarin. In this symposium, we got over 130 participants join this valuable event. There were more than 60 Hong Kong participants and 60 from the Mainland.

# Student Study tour

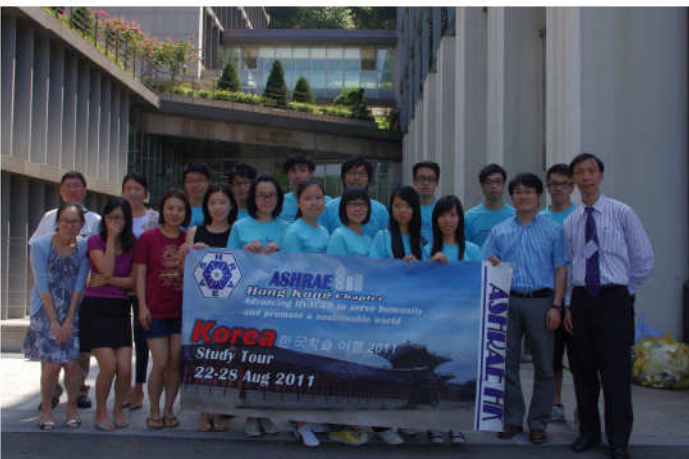

Date of event: 22rd to 28th Aug, 2011

ASHRAE Study Tour is one of the famous yearly activities organized for students. The study tour has been held for many years and reached many places, such as Taiwan, Thailand, and Singapore. Total 15 students from City University of Hong Kong (CityU), Hong Kong Polytechnic University (PolyU), Hong Kong University (HKU) and University of Science and Technology (HKUST) took part in this Korean tour from 22rd August to 28th August in 2011 summer.

During the seven-day trip, students visited four universities and two institutes named Seoul National University, Ewha Womans University, Yonsei University, Chungnam National University, Korea Advanced Institute of Science and Technology (KAIST) and Korea Institute of Energy Research (KIER). These visits not only acquiring engineering knowledge of students, but also can they had precious opportunities to have academic and cultural exchange with the local students through these universities' exchange.

Apart from academic visits and exchanges, students walked around some famous attraction spots in Korea such as Cheinggyecheon Museum, Digital Media City Gallery, Gyeongbokgung and N Seoul Tower. Through sightseeing, students can taste and understand the Korean culture more deeply and truly broaden their horizon.

Many students showed their enthusiasm in new technology of HVAC & R after the tour. All students were have an enjoyable time .

# Technical Workshop

## High Performance Building Design

Date of event: 1st and 2nd Jul, 2011

After the fruitful CRC technical seminar on 20th August 2011, the next morning, our Society Past pPresident as well as Distinguished Lecturer Mr. Kent Peterson, was again invited by ASHRAE Hong Kong Chapter and Hong Kong Green Building Council (HKGBC) to jointly organize a technical workshop about High Performance Building Design.

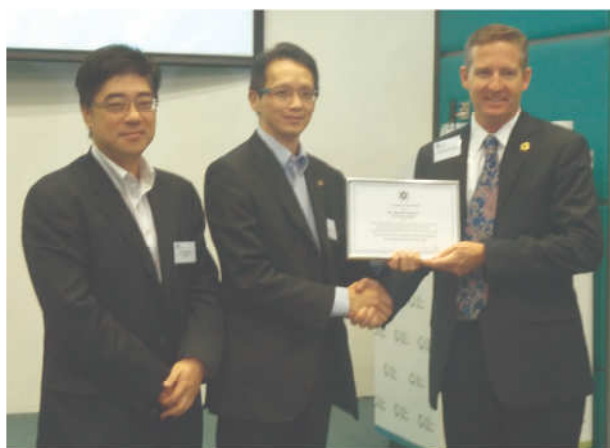

In the workshop, Mr. Kent Peterson talked about the essentials of high performance green building design, attributes including occupant productivity, energy efficiency, water efficiency, durability and life-cycle performance.

The ASHRAE Advanced Energy Design Guides (AEDG), a series of publications designed to provide recommendations for achieving energy savings over the minimum code requirements of ANSI/ASHRAE/IESNA Standard 90.1 which is the first step in the process toward achieving a net zero energy building which is defined as a building that, on an annual basis, draws from outside resources equal or less energy than it provides using on-site, renewable energy sources. The original series of guides have an energy savings target of 30% over 90.1-1999. A series of guides with an energy savings of 50% over 90.1-2004 are now underway. Mr. Kent Peterson showed the attendee how they achieve 50% energy reduction from the guides.

Lastly HKGBC, BEAM Faculty member Ir Dr Raymond Yau and ASHRAE HK Chapter Past President Mr. Tim Cheng presented Certificate of Appreciation to thank Mr. Kent Peterson for his contribution. There were total of 55 participants including BEAM Pro, HKGBC members and ASHRAE members.

ASHRAE  
Hong Kong Chapter

# Leadership Interview with Dr. Philip Yu

## 1. How did you decide to join engineering as your career ?

Engineer was my dream and eventually felt in love at my first job at Harbour City, where I was studying the chilled water system and making proposals to improve energy performance, etc.

However, one can hardly be recognized as an Engineer unless he/she becomes a full member of HKIE. So I studied hard at work for this recognition in early years of my engineering career. In this process, I knew more engineering friends and found that we can indeed contribute even more as an engineer.

## 2. What's the key to success?

Depending how you define “success”, I would say that it's very important to set our personal vision with achievable goals. Then work hard to reach the goals and the success will be realized along with goals being achieved one after another.

For me, I try to set a goal for the next stage as soon as it is reached and never give up at difficult time.

My perseverance in PhD studies – painful but rewarding, especially for a full-time worker – was inspired by Mr. S K Wang, HVAC&R lecturer at PloyU. I guess many seniors in the industry know him or have been his students like myself. I was involved in his effort of publishing the Handbook of Air Conditioning and Refrigeration and its 2nd edition. Even dying, he was still working hard on its 3rd edition! Obviously he has set the standard for success in my heart and probably in many young engineers' hearts.

## 3. What's your career outlook ?

I think the world is facing more and more environmental challenges and our next generations are running out of natural resources. It is everyone's responsibility to save the Earth or preserve the natural resources for our next generations. Engineers can play a key role, esp. those involved in building design, construction, installation, commissioning, operation and maintenance. To be a “responsible” engineer you will be successful in your career.

## 4. What made you join ASHRAE ? How do you feel about this big family?

Everyone knows that ASHRAE has so many standards and handbooks... what's even amazing is that they are all created by volunteers. As I mentioned earlier, as engineers, we may contribute even more. So I joined ASHRAE!

You are right to say ASHRAE is a big family. In 1992, I returned from the U.S. and my ex-lecturer Prof. Daniel Chan brought me to HK Chapter where I got to know one of the great founders, Dr. Edwin Tao and many “big brothers” of the industry. They were very kind and friendly, treated and taught me like younger brother. Not only that we had just a few members serving the Chapter at that time but also enjoyed a laissez-faire organization, or “do what you want”. In other words, we were pretty free to try new things such as launching the Chapter's Student Quality Projects campaign (1995) and official website (1996). Past-presidents and other chapter leaders were very supportive. In fact, I learned a lot from them including leadership style, effective business meeting (e.g. Robert's Rule of Order), team work, etc.

Dr. Roger Chu, one of my favorite ex-lecturers, highly encouraged the young generation to participate and we were empowered to take responsibilities... I did most of work in organizing the 5th annual joint symposium, ASHRAE's Centennial cum HK Chapter's 10th anniversary, Region XIII 2nd CRC, etc. All these background led me to the youngest Chapter President (1996-97) and the first RVC for Chapter Program (1998-2001) as well as the exposure to many Society Committee meetings where I really found ASHRAE a big family!

## 5. What achievement you feel the most honourable in ASHRAE? What's the largest challenge you had faced? And what's most impressed you?

Most honourable: published COOL Hong Kong – the Chapter's first book and the collective effort of 25 members.

Most impressive: on 25-26 Jan. 1997 at the ASHRAE winter meetings in Philadelphia, working with members of different countries from Far East (HK, Singapore and Malaysia) and some passionate U.S. members till 2 am to brainstorm ideas and to prepare a motion to form a Far East region (today known as Region XIII, the first ASHRAE region outside North America) that would represent our member's voice as well as link the members more directly to the Society!

Most challenging: Presidency, esp. being the youngest president in the Chapter's history; but Dr. Chu, Edwin Tao, Vincent Tse, and many others had given a lot of support and guidance.

# Research Promotion

## “COOL Hong Kong” – Book Launch Ceremony

Research Promotion Committee of ASHRAE Hong Kong Chapter organized a fundraising event for “COOL Hong Kong” – Book Launch Ceremony” on 19 August 2011 to support ASHRAE research. There were total 10 companies participated in this event with the sum of HK\$38,000 donation.

We would like to express our appreciation on these 10 companies for making contributions to ASHRAE Research.

## CTTC

The Chapter Technology Transfer Committee (CTTC) provides efficient and effective transfer of current and relevant information throughout the HVAC&R industry to and from the chapters. CTTC develops and maintains high quality and readily available tools to enable chapters to offer information and attractive industry-related information and programs to all segments within the HVAC&R industry.

Same as previous years, we would organize different technical seminars and workshops for our members and other professionals in building industry. Recent events were summarized as follows.

1. ASHRAE Region XIII CRC 2011 – Technical Talk by Kent Peterson on 18 September 2011 – High Performance Building Design
2. Hong Kong Joint Symposium 2011 – Technical Talk by Peter Simmonds on 22 November 2011- Designing an Intelligent Building Skin to Improve Occupant Comfort
3. Distinguish Lecture Talk by Peter Simmonds on 23 November 2011 - High Performance Building and Occupant Comfort

In 2012, we would organize two 4 days technical workshops. Below are the tentative themes and schedules of the two workshops for information.

Proposed Theme	Tentative Schedule
Indoor Environmental Quality and High Performance Building	Jan – Feb 2012
Green and Sustainable Building Design	Apr – May 2012

In addition to local experts, we would invite ASHRAE Distinguish Lectures (DLs) to deliver technical sharing in the above workshops. Below are tentative DLs and topics for information.

Tentative Name of DL	Topic
Brain P. Monk	Controlling Environmental Tobacco Smoke in Restaurants, Bars and Casinos
Sheila Hayter	Integrating Renewable Energy Systems into Buildings
Thomas Lawrence	Green building, LEED, and the new ASHRAE standard 189.1: 2009

# Young Member committee

To ensure the future of the Society and the industry, ASHRAE is committed to advancing its programs and services for young members through helping them build their professional foundations. With this in mind, ASHRAE-HKC created a committee called Young Member Committee (YMC), for members age 35 and younger!

To make more chances for the fresh graduate to know more about HVAC industry, it likes a bridge between fresh graduate and the professional to communicate and exchange their experience. In this year we will provide a number of the activities for our member.

The following are the activities that we proposed:

1. Art Jamming
2. War game
3. Charity Service
4. Country Walk
5. War game (Joint institution)
6. Christmas party (Joint institution)

## First YMC event highlight

Our first YMC event was held successfully on 29th October, 2011. There are 26 participants attended the art jamming lesson. We use our creativity to design our own drawing in a relaxing environment. It is also our pleasure to invite our Chapter President, Mr. Albert Lin, and his wife to join this event.

We hope that we can have fruitful and memorable activities this year.

*Come and Join ASHRAE!!!  
To become an ASHRAE's Youth  
Engineer!!*

# Student Activities

From 18 to 20 August 2011, the ASHRAE Region XIII student activities and student branches from Malaysia, Philippines, Singapore, Taiwan, Thailand, Indonesia and Hong Kong joined together for student competition, banquet dinner and technical visit. As being the member of student activities of Hong Kong Chapter, we were grateful to have this opportunity to arrange these technical and cultural sharing events for all ASHRAE students with the kindly supports of our team, various helpers etc. It was definitely a great gathering time for over 150 students being with us.

Through the participation of joint activities and communication with other students and student activities committees, we experienced the energy, creative idea and the enjoyable performances from ASHRAE student members. As well as the happiness of gathering, the deep friendship had been built between students and student activities.

Furthermore, we would like to express the appreciation to all helpers of joint student activities. The successes of events can't be achieved without their contribution and support. In all, we had made a fun and memorable times to all our ASHRAE friends.

*We Need  
Your  
Support!!!*

# Membership promotion

## RENEWING ASHRAE MEMBERSHIP ONLINE – QUICK INSTRUCTIONS

1. Login at [www.ashrae.org](http://www.ashrae.org).
2. Click Renew Membership (under Members tab or under Member Central in the left column).
3. Review and update contact information. Click Next.
4. Review and update technical and industry information. Click Next.
5. Select your membership package – ensure you select chapter dues if you participate in your chapter and Society collects chapter dues for your chapter. Click Next.
6. If you wish to make a research contribution, you may do so. Click Next.
7. You may also purchase ASHRAE bestsellers. Click Next.
8. Ensure your shopping cart has the items in it you requested. If yes, Check Out.
9. Reconfirm your contact information. Click Continue.
10. Enter payment information. Click Finish.
11. You will receive a confirmation from [orders@ashrae.org](mailto:orders@ashrae.org), and you can also Print Receipt on the final page.
12. If you have any trouble, please contact ASHRAE Hong Kong Chapter at [info@ashrae.org.hk](mailto:info@ashrae.org.hk).

## NEW MEMBERS & GRADE ADVANCEMENTS – WELCOME TO ASHRAE HONG KONG CHAPTER!

On behalf of Membership Promotion Committee of ASHRAE Hong Kong Chapter, we would like to extend a warm and hearty welcome to all our new members and members with grade advancement between the period of 1 July and 30 September 2011:- (Last names in alphabetical order)

# We Are Going Green!!

## We Are Changing to e-Newspaper!!

Dear Members,

Global Warming is definitely related to human activities, including deforestation. We, as a supporting society to sustainability have decided to change the distribution method of newsletter from hardcopy mailing to softcopy e-mailing.

From next newsletter onward, our newsletter will be distributed by email, which provides a hyper-link for your download. There will be no hardcopy distributing, unless you fill up the request form as attached below and mail it to P.O. Box 35612, King's Road Post Office, North Point, Hong Kong, China by 21st February, 2012.

Please verify your email address printed on the envelope. If your email address is incorrect, please send an email to newsletter@ashrae.org.hk including your preferred email address, your name and your ASHRAE membership number and we will update in advance.

We highly appreciated your support in environment. Please consider deeply before you filling up the request form.

**“The Green decision is on your hand.”**

It is remaindered that it is a **ONE-OFF** requisition on hardcopy newsletter, and late application is not accepted.

Yours faithfully,

*Joao Wong*

Chair
