

COOL HONGKONG

冷暖情怀在香港

Documenting the development of HVAC&R in Hong Kong... 从1912年的建筑出发见证及展望香港的暖通空调

Publisher
ASHRAE Hong Kong Chapter
美国供暖制冷及空调工程师学会香港分会

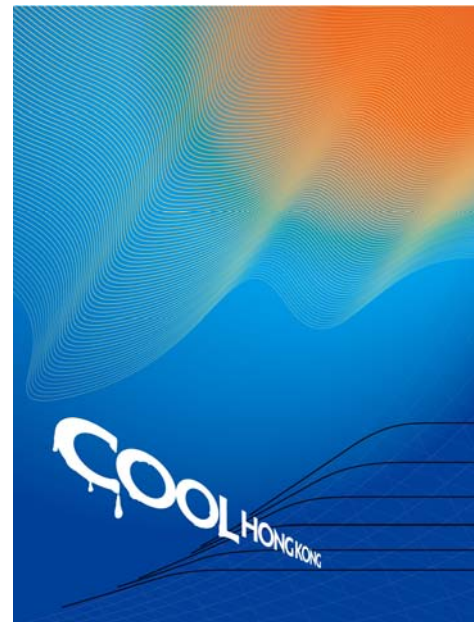

List Price: HK\$250 ASHRAE Member Price: HK\$125

Total pages: 153

Circulation: 2000 (English); 1000(Chinese -simplified)

Contents highlight:

- *The first book in Hong Kong documenting the development and future outlook of HVAC&R for the local building industry. It is not only a collection of the wisdom of the engineers who involved the system design, construction and operation but also a collection of many precious photos and drawings.*
- *25 renowned building projects, including Supreme Court(1912), Peninsula Hotel(1928), HSBC Main Building(1985), Bank of China Tower(1989), Two ifc(2003), Island East(2008),etc. The description of HVAC&R system, controls/automation system and even building energy upgrade for these selected buildings are written in simple language so as to suit a broader range of readers.*
- *Forward by Secretary for the Environment Hong Kong SAR Government, Preface by Society President of ASHRAE, and many other special yet interesting articles such as air-conditioning's impact on the life of Hong Kong people, air-conditioning for SARS wards, evolution of air-conditioning systems in the government sector, HVAC development and future outlook, etc.*

...25 building projects from 1912
