**Programme Highlights**

Building Information Modeling (BIM) is becoming a hot topic among all engineers and consultants in the Building and Construction industry in recent years. It aims to help all disciplines to communicate better and save cost. For Building Service area, some developers already realize benefits using BIM to eliminate coordination problems and reduce rework. This talk shows a real cases how BIM helps project team to improve the communication among the project design team, enhanced the efficiency on checking the building constructability and functionality and shortened the time design alternative study and confirmation, coordinated services drawings and enhanced the efficiency of building handover to Facilities Manager/Tenants.

**Speaker**
