ASHRAE Night 2015

Speech by Honourable Speaker

DR. T T Chow

Associate Professor at the City University of Hong Kong

Topic

“Low Energy Building Technologies in Meeting Our Society Needs”

Abstract:

To combat the global climate change and the ever-increasing local electricity demand, there is a crucial need for Hong Kong to explore ways of reducing greenhouse gas emission. Presently, more than 90% of our annual electricity consumption is used up in buildings. The HK3030 campaign calls for a reduction of 30% of the absolute amount of electricity used in buildings by 2030, as compared to the 2005 level. In this talk, a number of low energy building technologies will be shared. While there should be thoughtful solutions towards the new building design and construction, the efforts on the exiting building stock is equally important. The opportunities and likely obstacles will be discussed with the audience.

The Speaker:

Dr. Chow is the Director of the Building Energy and Environmental Technology Research Unit of the Division of Building Science and Technology at the City University of Hong Kong. He is also a Director of the BEAM Society Ltd. serving as the Energy Use Panel Chair, as well as a number of committees in the Hong Kong Green Building Council and the Hong Kong Government. Dr. Chow is Fellow of ASHRAE, CIBSE and HKIE, and Guest Professor of the University of Science and Technology of China. He has over 300 publications; more than half of these are academic journal articles. He is a Past President of the ASHRAE Hong Kong Chapter.
